

COMPANY PROFILE

Who Are We?

- ▶ Since the first day we started to operate, we were servicing in sports structures and social areas with more than 20 years of experience and creating designs of the future in order to have a better quality social spaces that people will reach in 48 countries.
- ▶ As Integral Group, we carry out constantly new and elegant projects in Turkey, Middle East, Africa, Europe and Asia. With an advanced network, we have offices in Istanbul, New York, London, Moscow and Doha. Our 13 brands are rapidly having more value and extending its operations.

Global Leader

in Sports Structures

- Integral Group designs and builds facilities of the future with a vision of becoming a global leader in sports structures. The first aim is to take place in different countries and widen its activities each day at the global scale in sports and social areas.
- Our company consists of a young and professional team that believes in this mission that will bring real success.

Our Vision

- We work to become a leading company in its field on a global scale, having built sports facilities and created social areas in every country of the world, having partners in every region.

Our Mission

- We are here to build sports facilities and social areas that will enable people to live better.

Turnkey Projects

- We build modern, useful solid structures for people's use. We produce turnkey projects.
- An important part of the time is reoffer serviced to project development and planning. We make plans for each project's production, shipment and installation process which are carried out meticulously with sticking to the well structured process by Integral Group's experts.

Manufacturing

- For the projects developed by itself with its corporate manufacturer identity, Integral Group manages the manufacturing processes in line with the plan. The products of the integral group companies are manufactured at world standards with first-class raw materials and made ready for the installation process.

Application

- Integral Group provides service to its customers by carrying out the installation process of the projects it produces as well. Our engineers, technical staff and operations units work to complete all stages with tailor's meticulousness, sticking to the project plan and central coordination.

Research and Development

- Our R&D team works to make sure that our products and product range are always up to date and in compliance with the necessities of the time. On one hand, while updating our products and developing new products, we also diversify our product range within the frame of expectations and demands.

Test

- After the project is completed, it is tested by an accredited auditing organization to ensure it meets the required standards. This service, which guarantees both quality and life of the field, is provided as a result of the perfectionist perspective of Integral Integrated Systems.
